SKILLS

JavaScript	Node.js	Express.js	MongoDB	Angular 2+	AngularJS
TypeScript	HTML5	CSS3	PostgreSQL	Bootstrap	AWS
Python	JQuery/AJAX	MySQL	Git/Github	RESTful APIs	Django
Appian	Ruby on Rails	TDD	Materialize	OOP	Git/Github

EXPERIENCE

REI Systems Inc., Washington, D.C. — *Application Programmer*

August 2017 to Present

- Built Report dashboard (Angular, HTML5, CSS3) to aggregate and facilitate the analysis of financial data for the REI team at the Office of The Comptroller of the Currency.
- Full stack developer on Agile team supporting CATS (Central Application Tracking System). This system allows U.S financial institutions to submit and process their different applications and notices electronically.
- Recipient of REI's "On The Spot Award" for outstanding performance in critical role within the CATS development team.
- Development work on defects/stories involving front end work, database changes, and everything in between. Constant communication with client.

Coding Dojo, Washington, D.C. — *Apprentice Bootcamp Leader / Web Development*

December 2016 to July 2017

- Led first Angular 2 cohort which resulted in becoming the Angular subject matter expert.
- Achieved an 87.2% student passing rate by leading cohorts through a technology stack each month. This included leading technical lectures, guiding algorithm sessions, and providing technical coaching.
- Provided technical coaching for multiple technology stacks including: Web Fundamentals, Python with Django stack, MEAN stack, and Ruby on Rails Stack.
- Improved the learning platform by creating solution files and video walkthroughs for key assignments, and making various corrections/additions to different courses.

Ahead of the Game Marketing, Miami, FL — *Web Consultant*

July 2015 to April 2016

- Consulted with clients to gather requirements and develop simple web solutions using HTML5, CSS3, and JavaScript.

EDUCATION

Coding Dojo, Washington, D.C — *Full Stack Web Development*

Graduated: October 2016

- Triple Black Belt - Highest level of academic achievement.
- Immersive coding bootcamp for full stack web development for MEAN, Ruby on Rails, and Python/Django.
- Earned over 1,000 hours of hands on coding experience.

University of Florida, Gainesville, FL — *B.S Industrial and Systems Engineering*

Graduated: August 2014

PROJECTS

Adanote, [adanote.net](#) — *Python, Django, JQuery, JQueryUI, AJAX, HTML5, CSS3*

Deployed using an AWS EC2 instance.

- Add, delete, and update notes quickly using AJAX (no page refresh).
- Sort notes by drag-and-drop using JQueryUI.

User Dashboard, [GitHub](#) — *Python, Django, HTML5, CSS3, Bootstrap*

Group project using Github.

- Facebook-like app where users can post messages and comments, check out other's profiles and update their own.
- Full Login and Registration functionality and an Admin page to perform CRUD operations on users.
